EXECUTIVE SUMMARY

As a highly skilled and experienced frontend developer, I have had the privilege of working at DANA for the past four years, contributing to the success and growth of the company. During my tenure, I have consistently demonstrated my expertise in frontend development, delivering high-quality and innovative solutions that have positively impacted the organization.

Throughout my time at DANA, I have been involved in various key projects, collaborating closely with cross-functional teams to create responsive and visually appealing user interfaces. I have been responsible for implementing cutting-edge technologies and best practices, ensuring optimal performance and seamless user experiences across multiple devices and platforms.

Working in a fast-paced and dynamic environment, I have developed strong communication and collaboration skills, effectively collaborating with designers, backend developers, and stakeholders to ensure alignment and successful project outcomes. My ability to prioritize tasks, meet deadlines, and adapt to evolving project requirements has been key to delivering successful projects within schedule and budget constraints.

In summary, my four years of experience as a frontend developer at Dana have provided me with the expertise and skills necessary to drive the success of frontend development initiatives. I am confident in my ability to contribute to the company's continued growth, delivering exceptional user experiences and innovative solutions.

FUNCTIONAL EXPERTISE

- **Node.js & Express (Basic)**
- **HTML CSS (Intermediate)**
- **React, Redux (Intermediate)**
- **Next (Intermediate)**
- **Vue, Vuex, Pinia (Intermediate)**
- **Nuxt (Intermediate)**
- **Tailwind (Intermediate)**
- **Git and Github (Intermediate)**
- **Mongodb, Postgres, and SQL (Basic)**

RELEVANT PROJECTS

Virtoe - Web VR game
Real-time multiplayer Tictactoe game with Virtual Reality capabilities
Role : Fullstack Developer
Frameworks and Libraries : JavaScript, React, React VR, Redux, Firebase, Mongo db
Project description :
Developed using Firebase to implement real-time multiplayer game and React VR for Web VR capabilities. I work as fullstack developer for this final project at Hacktiv8 coding bootcamp.
Source Code : https://github.com/vr-tictactoe/

Demo : https://backup-vr-tictactoe.firebaseapp.com

Hacktiv8 Overflow
A question and answer forum
Role : Solo Project
Language : Javascript
Frameworks and Libraries : Vue, Vuex, ExpressJs, Mongoose, Google Cloud Platform, Mongodb
Project description :
A question and answer that user can post a question, answer and up/down vote question and answer
Source Code : https://github.com/ipunganwar/hacktivoverflow

PROFESSIONAL EXPERIENCE

PT.Multiintegra Digital (Freelance) **March 2024 - May 2024**
Project : People Counting for LRT Jakarta
Role : Frontend engineer using Nextjs, Tailwind
Language : Javascript
Jobdesc : As frontend developer my day to day task is:

- Collaborated with backend developers on asynchronous programming and RESTful API integration
- Contributed to an agile development environment, participating in sprint planning, daily stand-ups, and code reviews.
- Worked closely with UX/UI designers to transform design mockups into functional and visually appealing user interfaces.

PT.Multiintegra Digital (Freelance) **November 2023 - Februari 2024**
Project : Learning Management System for Kementerian Perdesaan
Role : Frontend engineer using Vuejs, Tailwind
Language : Javascript
Jobdesc : As frontend developer my day to day task is:

- Collaborated with backend developers on asynchronous programming and RESTful API integration
- Contributed to an agile development environment, participating in sprint planning, daily stand-ups, and code reviews.
- Worked closely with UX/UI designers to transform design mockups into functional and visually appealing user interfaces.

PT Espay Debit Indonesia Koe (DANA Indonesia) **November 2019 - November 2023**
DANA is a technology company, a highly secured and scalable payment service platform in Indonesia.
Role : Frontend engineer, Payment Division collaborated with 3 other members
Language : Javascript
Frameworks and Libraries : ReactJs, Vue, NextJs, CSS, HTML, Jenkins, Tailwind, GraphQL
Jobdesc : As frontend developer in payment division my day to day task is :

- Collaborated with cross-functional teams to design and develop responsive user interfaces for payment-related web and mobile applications.
- Integrated frontend components seamlessly with various payment gateways, ensuring a secure and efficient payment process.
- Ensured cross-browser compatibility and optimized frontend code for enhanced performance across different devices.

- Worked closely with UX/UI designers to transform design mockups into functional and visually appealing user interfaces.
- Collaborated with backend developers on asynchronous programming and RESTful API integration
- Contributed to an agile development environment, participating in sprint planning, daily stand-ups, and code reviews.

Volantis Technology **January 2019 - July 2019**

An startup company that provides end-to-end data solutions for business and institution, empowered by machine learning and AI.

Role : Frontend engineer, collaborated with other 2 team members
Language : Javascript
Frameworks and Libraries : ReactJs, Redux, Styled Component, CSS, HTML
Jobdesc :

- Worked closely with UX/UI designers to transform design mockups into functional and visually appealing user interfaces.
- Ensured cross-browser compatibility and optimized frontend code for enhanced performance across different devices.
- Collaborated with backend developers on asynchronous programming and RESTful API integration
- Contributed to an agile development environment, participating in sprint planning, daily stand-ups, and code reviews.

KotakMakan **February 2018 - January 2019**

An electronic canteen ecosystem for helping student and canteen owner to have more efficient transaction flow

Role : Full-Stack engineer, collaborated with other 5 team members
Language : Javascript
Frameworks and Libraries : React Native, GraphQL, Express, mongoose for MongoDB.
Jobdesc :

- Spearheaded the development of web applications, taking ownership of both frontend and backend components.
- Collaborated with cross-functional teams to understand project requirements and translate them into robust software solutions.
- Developed scalable backend solutions, leveraging technologies such as Node.js, Express, and MongoDB.
- Integrated third-party APIs and services to enhance application functionality.

PT Hanoman Cendekia Interaktif (HCI) **March 2015 – August 2017**

System Administrator

I worked as System Administrator to support the performance of the team which where we are assigned to develop a system for banking applications. Working at this position had taught me about self control and teamwork, that to achieve a great goal, we should be a solid team. These are the following works as System Administrator:

- Mapping, Routing and maintenance the middleware application (IBM Websphere, XML, and Java).
- Install in configuration and maintenance of web server (IBM Web Application Server).

- Configuration and maintenance the database (IBM DB2).
- Creating a schedule and breaking it down into monthly schedule.
- Monitoring, maintain, manage server on production and test environment.
- Troubleshoot in case of server issue either OS or Hardware

EDUCATION

Bootcamp (Full-Stack Web Development). Hacktiv8 (Jakarta, Indonesia) **2018**
Diploma (Informatics Management). Bina Sarana Informatika (Jakarta, Indonesia) **2015**
